6. Information you provide to us. We collect the following information:
- 6.1. **Account and Profile Information:** We collect information about you and your company as you register for an account, create or modify your profile, make purchases through, use, access, or interact with the Ataccama Services (including but not limited to when you upload, download, collaborate on or share Content).  - 6.3. In some cases another user (such as a system administrator) may create an account on your behalf and may provide your information, including Personal Information (most commonly when your company requests that you use our products). We collect Information under the direction of our customers and often have no direct relationship with the individuals whose personal data we process. If you are an employee of one of our customers and would no longer like us to process your information, please contact your employer. If you are providing information (including Personal Information) about someone else, you must

have the authority to act for them and to consent to the collection and use of their Personal Information as described in this Privacy Policy.

- 6.4. **Content:** We collect and store Content that you create, input, submit, post, upload, transmit, store or display in the process of using our SaaS Products or Websites. Such Content includes any Personal Information or other sensitive information that you choose to include ("incidentally-collected Personal Information").
 - 6.5. **Other submissions:** We collect other data that you submit to our Websites or as you participate in any interactive features of the Ataccama Services, participate in a survey, contest, promotion, sweepstakes, activity or event, apply for a job, request customer support, communicate with us via third party social media sites or otherwise communicate with us. For example, information regarding a problem you are experiencing with an Ataccama product could be submitted to our Support Services or posted in our public forums.
7. Information we collect from your use of Ataccama Services
- 7.1. **Web Logs:** As is true with most websites and services delivered over the Internet, we gather certain information and store it in log files when you interact with our Websites and SaaS Products. This information includes internet protocol (IP) addresses as well as browser type, internet service provider, URLs of referring/exit pages, operating system, date/time stamp, information you search for, locale and language preferences, identification numbers associated with your Devices, your mobile carrier, and system configuration information. In the case of our SaaS Product, the URLs you accessed (and therefore included in our log files) include usernames as well as elements of Content (such as RDM on Demand table names, views and workflow names) as necessary for the SaaS Product to perform the requested operations. Occasionally, we connect Personal Information to information gathered in our log files as necessary to improve Ataccama Services for individual customers. In such a case, we would treat the combined Information in accordance with this privacy policy.
 - 7.2. **Analytics Information from Website and SaaS Products:** We collect analytics information when you use our Websites and SaaS Products to help us improve our products and services. In the SaaS Products, this analytics information consists of the feature and function of the Ataccama Service being used, the domain name, the username and IP address of the individual who is using the feature or function (which will include Personal Information if the Personal Information was incorporated into the username), the sizes and original filenames of attachments, and additional information required to detail the operation of the function and which parts of the Ataccama Services are being affected.
 - 7.3. As of the date this policy went into effect, we use Google Analytics as an analytics provider. To learn more about the privacy policy of Google Analytics, refer to [Google's Policies and Principles](#). Use the [Google Analytics Opt-out Browser Add-on](#) to prevent analytics information from being sent to Google Analytics.
 - 7.4. **Analytics Information Derived from Content.** Analytics information also consists of data we collect as a result of running queries against Content across our user base for the purposes of generating Usage Data. "Usage Data" is aggregated data about a group or category of services, features or users that does not contain Personal Information.

- 7.5. Though we may happen upon sensitive or Personal Information as we compile Usage Data from Content across user instances, this is a byproduct of our efforts to understand broader patterns and trends. It is not a concerted effort by us to examine the Content of any particular customer.
- 7.6. **Analytics Information from Downloadable Products:** We collect analytics information when you use our Downloadable Products to help us improve our products and services. Our Downloadable Products contain a feature that sends information about the technical operation of the Downloadable Products on your systems ("System Information") to us. System Information includes information about (a) the server environment in which the Downloadable Product is operating: OS type and version, JVM version, Java environment properties, CPU type, RAM allocation, language and locale settings, database type and version, and disk utilization, as well as (b) user client information, for example: browser type and version, native client type and version, and client device specifications (e.g. screen resolution, OS version, device type, etc.). In addition, we collect analytics information from Downloadable Products that is a subset of the analytics information described above for Websites and SaaS Products. As with Websites and SaaS Products, the analytics information we collect includes elements of Content related to the function the user is performing, but with an important caveat. With the Downloadable Products, before sending the information to Ataccama's servers, we filter the analytics information to remove elements that we believe may contain sensitive or Personal Information. For example: (1) we conduct a one-way hash of usernames and hostnames before collecting them and (2) we filter any Content elements we collect to discard all words except those on a list of common business and IT terminology. You can disable our collection of analytics information from Downloadable Products via the Administrator settings or by blocking collection at the local network level.
- 7.7. **Cookies and Other Tracking Technologies:** Ataccama and our third party partners, such as our advertising and analytics partners, use various technologies to collect information, such as cookies and web beacons. Cookies are small data files stored on your hard drive or in device memory. We use cookies to improve and customize Ataccama Services and your experience; to allow you to access and use the Websites or SaaS Products without re-entering your username or password; and to count visits and understand which areas and features of the Websites and SaaS Products are most popular. You can instruct your browser, by changing its options, to stop accepting cookies or to prompt you before accepting a cookie from websites you visit. If you do not accept cookies, however, you may not be able to use all aspects of our Websites or SaaS Products. Ataccama and our third party partners also collect information using web beacons (also known as "tracking pixels"). Web beacons are electronic images that may be used in our Websites or SaaS Products or in emails that help us to deliver cookies, count visits, understand usage and campaign effectiveness and determine whether an email has been opened and acted upon.
- 7.8. Ataccama and our third party partners also use javascript, e-tags, and HTML5 local storage to collect information about your online activities over time and across different websites or online services. Many browsers include their own management tools for removing HTML5 local storage objects.
- 7.9. You may be able to opt out of receiving personalized advertisements as described below under "Your Choices."
8. How we use Information we collect

- 8.3. **Compiling aggregate analytics information:** Because our SaaS Products and Downloadable Products are some of the most configurable in the market, we make extensive use of analytics information (including log and configuration data) to understand how our products are being configured and used, how they can be improved for the benefit of all of our users, and to develop new products and services. As such we generate Usage Data (as defined above) from the web logs and analytics logs described above, including the Content elements captured in such logs, as well as from the Content stored in the Websites and SaaS Products.

Where this information is sensitive, we urge you to use the various security and privacy features of the Ataccama Services to limit those who can access such information. These service providers may have access to or process your Information for the purpose of providing those services for us. Some of our pages utilize white-labeling techniques to serve content from our service providers while providing the look and feel of our site. Please be aware that you are providing your Information to these third parties acting on behalf of Ataccama.
- 9.7. **Third Party Add-Ons:** You may choose to make use of third party Add-Ons in conjunction with Ataccama Services. Third party Add-Ons are software written by third parties to which you grant access privileges to your Content (which may include your Personal Information). When access is granted, your Content is shared with the third party. Third party Add-On policies and procedures are not controlled by Ataccama

even though the third party Add-On may be available through Ataccama Services. Third parties who have been granted access to your Content through Add-Ons could use this data to contact you and market services to you, and could share your data with other third parties. This Privacy Policy does not cover the collection or use of your data by third party Add-Ons, and we urge you to consider the privacy policies governing third party Add-Ons.
